🏢 About BMCHRC

Established in 1997, BMCHRC is a 300-bed, NABH and NABL accredited super-specialty cancer hospital located in Jaipur, Rajasthan. Managed by the K.G. Kothari Memorial Trust, the hospital was founded with the mission to provide affordable cancer care with a human touch. It has grown from a modest 50-bed facility to a leading institution in oncology care over the past decades. bmchrc.org+1

🎯 Mission & Vision

- Mission: To provide affordable care with a human touch to all sections of society, irrespective of economic considerations.
- Vision: To establish BMCHRC as a comprehensive world-class cancer treatment facility with cutting-edge technology. bmchrc.org

---

🏢 Facilities & Infrastructure

- Bed Capacity: 300 beds
- Departments:
    - Surgical Oncology
    - Medical Oncology
    - Radiation Oncology
    - Hematology-Oncology
    - Neuro-Oncology
    - Plastic & Reconstructive Surgery
    - Orthopedic Oncology
    - Palliative & Pain Care
    - Bone Marrow Transplant (BMT)
    - Preventive Oncology
    - Laboratory and Transfusion Services
    - Clinical Support Services

- Gastroenterology
- Anaesthesia & Critical Care
- Radiology & Interventional Oncology
- Internal Medicine

🏆 Achievements & Recognition

- Ranked No. 1 in Northern India and No. 8 nationally for excellence in cancer care by the Times Now Health Ranking 2024. The Times of India
- Over 2.5 lakh registered patients served.
- Conducted over 60,000 cancer surgeries and administered more than 58,000 radiation therapies.
- Performed over 6 lakh chemotherapy sessions.
- Established a Bone Marrow Transplant (BMT) unit in 2022. Wikipedia

---

□ Research & Technology

BMCHRC is committed to advancing cancer treatment through research and the adoption of cutting-edge technology:

- First in Rajasthan to install a Linear Accelerator and PET CT scanner.
- Utilizes advanced techniques such as TrueBeam STx, RapidArc, IMRT, IGRT, and SRS/SRT.
- Equipped with 4 Linear Accelerators, Gamma Camera, and MRI machines.
- Operates 6 integrated modular operation theatres and a 14-bed surgical ICU.
- Offers specialized services like Laser Cancer Surgery and Micro Laryngeal Surgery. Wikipedia

---

🌍 Community Outreach & Welfare Initiatives

BMCHRC is deeply committed to community service and welfare:

- Organized over 1,500 cancer screening camps across Rajasthan and neighboring states.
- Operates mobile cancer screening vans equipped with mammography and laboratory facilities.
- Provides free treatment to underprivileged children and families through various welfare programs.
- Initiatives include:
    - Donate A Life
    - Annual Surveillance & Early Detection of Cancer
    - Freedom From Cancer (Chronic Myeloid Leukemia)
    - Breast Cancer Recurrence Prevention Project
    - Wilms Tumor Project
    - Cure Thyroid Cancer Project
    - Compassionate Cancer Care Project
    - Save Mother Cervical Cancer Project Wikipedia

🎓 Education & Training

BMCHRC is dedicated to education and training in the field of oncology:

- Established the BMCHRC College of Nursing in 2005, graduating over 1,000 students by March 2022.
- Offers specialized programs including:
    - Fellowship in Oncopathology
    - Post Doctoral Certificate Course (PDCC) in Oncopathology
    - Internship in Psychology
    - Advanced Reconstructive Microsurgery Training
    - Palliative Care Training Wikipedia

🩺 Doctors at BMCHRC

Medical Oncology

- **Dr. Ajay Bapna**
  Director & HOD
  Specializes in Medical Oncology. bmchrc.org
- **Dr. Deepak Gupta**
  Addl. Director- Medical Oncology
  Specializes in Medical Oncology. bmchrc.org
- **Dr. Pawan Agarwal**
  Senior Consultant
  Specializes in Medical Oncology. bmchrc.org
- **Dr. Aseem Kumar Samar**
  Senior Consultant
  Specializes in Medical Oncology. bmchrc.org

Surgical Oncology

- **Dr. Sanjeev Patni**
  Director & HOD
  Specializes in Surgical Oncology. bmchrc.org
- **Dr. Anil Kumar Gupta**
  Addl. Director- Surgical Oncology
  Specializes in Surgical Oncology. bmchrc.org
- **Dr. Shashikant Saini**
  Senior Consultant
  Specializes in Surgical Oncology. bmchrc.org
- **Dr. Naresh Ledwani**
  Senior Consultant
  Specializes in Surgical Oncology. bmchrc.org

Hemato Oncology

- **Dr. Upendra Sharma**
  Senior Consultant
  Specializes in Hemato Oncology. bmchrc.org
- **Dr. Prakash Singh Shekhawat**
  Consultant
  Specializes in Hemato Oncology & Bone Marrow Transplant. bmchrc.org

Anaesthesia & Critical Care

- **Dr. Anjum S. Khan Joad**
  Director Anaesthesia, Director & HOD Palliative Care
  Specializes in Anaesthesia & Palliative Care. bmchrc.org
- **Dr. Pushplata Gupta**
  Senior Consultant & HOD
  Specializes in Anaesthesia. bmchrc.org
- **Dr. Manisha Hemrajani**
  Senior Consultant
  Specializes in Anaesthesia.

1. Paracetamol (Acetaminophen)

- **Use:** Pain relief, fever reducer
- **Common Side Effects:** Rare, but may include nausea, rash, liver damage in overdose

---

2. Ibuprofen

- **Use:** Pain, inflammation, fever
- **Common Side Effects:** Stomach upset, heartburn, dizziness, risk of ulcers with long-term use

---

3. **Aspirin**

- **Use:** Pain, inflammation, antiplatelet (blood thinner)
- **Common Side Effects:** Stomach irritation, bleeding, ulcers, allergic reactions (in some)

---

4. Amoxicillin (Antibiotic)

- **Use:** Bacterial infections (e.g., ear, throat, respiratory, UTI)
- **Common Side Effects:** Diarrhea, rash, nausea, allergic reactions

---

5. Ciprofloxacin (Antibiotic – Fluoroquinolone)

- **Use:** UTIs, respiratory infections, skin infections
- **Common Side Effects:** Nausea, diarrhea, dizziness, tendon pain (rare serious risk)

---

6. Azithromycin (Antibiotic – Macrolide)

- **Use:** Respiratory infections, skin infections, STIs
- **Common Side Effects:** Nausea, abdominal pain, diarrhea

---

7. Metronidazole

- **Use:** Bacterial & parasitic infections (e.g., amoebiasis, dental infections)
- **Common Side Effects:** Metallic taste, nausea, headache, avoid alcohol (causes reaction)

---

8. Cetirizine (Antihistamine)

- **Use:** Allergic rhinitis, hives, itching
- **Common Side Effects:** Drowsiness, dry mouth, headache

---

9. Loratadine

- **Use:** Allergies (non-drowsy alternative to cetirizine)
- **Common Side Effects:** Headache, fatigue (rare)

---

10. Diphenhydramine (Benadryl)

- **Use:** Allergies, insomnia, motion sickness
- **Common Side Effects:** Drowsiness, dry mouth, blurred vision, urinary retention

---

11. Omeprazole (Proton Pump Inhibitor - PPI)

- **Use:** Acid reflux, GERD, peptic ulcers
- **Common Side Effects:** Headache, nausea, long-term use may lower magnesium or B12

---

12. Ranitidine (H2 blocker – Note: less used now due to safety concerns)

- **Use:** Acid reflux, ulcers
- **Common Side Effects:** Headache, constipation or diarrhea

---

13. Pantoprazole (PPI)

- **Use:** Acid reflux, GERD, ulcers
- **Common Side Effects:** Headache, diarrhea, long-term use may affect minerals/vitamins

---

14. Metformin

- **Use:** Type 2 Diabetes (lowers blood glucose)

- **Common Side Effects:** Nausea, diarrhea, abdominal discomfort, rare lactic acidosis

---

15. Insulin

- **Use:** Type 1 & Type 2 Diabetes (blood sugar control)
- **Common Side Effects:** Hypoglycemia, injection site reactions, weight gain

---

16. Amlodipine (Calcium channel blocker)

- **Use:** Hypertension, angina
- **Common Side Effects:** Swelling of ankles, flushing, dizziness, headache

---

17. Losartan (Angiotensin receptor blocker - ARB)

- **Use:** Hypertension, heart failure, kidney protection in diabetes
- **Common Side Effects:** Dizziness, fatigue, cough (less common than ACE inhibitors)

---

18. Atenolol (Beta-blocker)

- **Use:** Hypertension, angina, arrhythmias
- **Common Side Effects:** Fatigue, cold extremities, slow heart rate, dizziness

---

19. Furosemide (Loop diuretic)

- **Use:** Edema, hypertension, heart failure
- **Common Side Effects:** Frequent urination, dehydration, electrolyte imbalance, dizziness

---

20. Prednisolone (Corticosteroid)

- **Use:** Inflammation, allergies, asthma, autoimmune disorders
- **Common Side Effects:** Increased appetite, weight gain, mood swings, long-term: osteoporosis, infections

---

21. Salbutamol (Albuterol)

- **Use:** Asthma, bronchospasm (bronchodilator)
- **Common Side Effects:** Tremors, fast heartbeat, headache, nervousness

---

22. Atorvastatin (Statin)

- **Use:** Lower cholesterol, prevent heart disease
- **Common Side Effects:** Muscle pain, fatigue, nausea, rare liver enzyme elevation

---

23. Diazepam (Benzodiazepine)

- **Use:** Anxiety, muscle spasms, seizures, insomnia
- **Common Side Effects:** Drowsiness, confusion, dependence with prolonged use

---

24. Sertraline (SSRI Antidepressant)

- **Use:** Depression, anxiety disorders
- **Common Side Effects:** Nausea, insomnia, sexual dysfunction, headache

---

25. Morphine (Opioid Analgesic)

- **Use:** Severe pain relief
- **Common Side Effects:** Constipation, drowsiness, nausea, respiratory depression (serious), addiction risk

26. Doxycycline (Antibiotic – Tetracycline class)

- **Use:** Acne, respiratory infections, malaria prophylaxis, STIs
- **Side Effects:** Stomach upset, photosensitivity (sunburn), nausea, tooth discoloration (long-term)

---

27. Clindamycin (Antibiotic)

- **Use:** Skin infections, dental infections, bone infections
- **Side Effects:** Diarrhea, nausea, risk of *Clostridium difficile* infection (serious)

---

28. Hydrocortisone (Topical/Oral)

- **Use:** Skin inflammation, eczema, allergic rashes
- **Side Effects:** Skin thinning (topical), increased appetite, mood changes (oral)

---

29. Loperamide

- **Use:** Symptomatic treatment of diarrhea
- **Side Effects:** Constipation, abdominal cramps, dizziness, nausea

---

30. Iron Supplements (Ferrous Sulfate)

- **Use:** Iron-deficiency anemia
- **Side Effects:** Constipation, dark stools, nausea, stomach pain

---

31. Vitamin D (Cholecalciferol)

- **Use:** Vitamin D deficiency, bone health
- **Side Effects:** Rare in normal doses; high doses → nausea, hypercalcemia

---

32. Folic Acid

- **Use:** Anemia, pregnancy supplementation, neural tube defect prevention
- **Side Effects:** Usually well-tolerated; rare allergic reactions

---

33. Warfarin (Anticoagulant)

- **Use:** Prevent/treat blood clots (e.g., DVT, PE, atrial fibrillation)
- **Side Effects:** Bleeding, bruising, requires regular INR monitoring

---

34. Heparin (Anticoagulant – injection)

- **Use:** Prevent/treat blood clots, during surgeries
- **Side Effects:** Bleeding, injection site reactions, heparin-induced thrombocytopenia (rare)

---

35. Nitroglycerin (Nitrate)

- **Use:** Angina (chest pain) relief
- **Side Effects:** Headache, flushing, dizziness, low blood pressure

---

36. Levothyroxine (Synthetic thyroid hormone)

- **Use:** Hypothyroidism
- **Side Effects:** Overdose → hyperthyroid symptoms (e.g., palpitations, anxiety, weight loss)

---

37. Oral Contraceptive Pills (e.g., Ethinylestradiol + Levonorgestrel)

- **Use:** Birth control, menstrual cycle regulation
- **Side Effects:** Nausea, breast tenderness, headache, mood changes, rare risk of blood clots

---

38. Sildenafil (Viagra)

- **Use:** Erectile dysfunction, pulmonary hypertension
- **Side Effects:** Headache, flushing, dizziness, visual disturbances, rare hypotension

---

39. Diclofenac (NSAID)

- **Use:** Pain, inflammation (muscle, joint pain, arthritis)
- **Side Effects:** Stomach upset, ulcers, increased cardiovascular risk with long use

---

40. Tramadol (Opioid-like Analgesic)

- **Use:** Moderate to severe pain
- **Side Effects:** Nausea, dizziness, drowsiness, risk of dependence, constipation, seizures (rare in high dose)
